

## Paisley To Integrate Into Microsoft Office Visio “12”

2006-01-27 09:00:00.0 CDT

Paisley Consulting, the recognized leader in business accountability software, has announced that it has been selected as one of the compliance software vendors of choice to participate in the integration of a beta version of Microsoft Office Visio “12”, a diagramming tool that makes it easy for IT and business professionals to visualize, analyze and communicate complex information, systems and processes.

The complete integrated version, which will provide an enterprise the ability to enter business processes and run visual reports on existing processes, risk and control information throughout their company, is expected to be released after the launch of Microsoft Office Visio “12” that is planned for the second half of 2006. A prototype of the integrated Paisley & Visio solution was demonstrated by Paisley Consulting at the Microsoft Visio Conference in Seattle, Washington on January 20th

Paisley Consulting

“We are excited to integrate Visio “12” into our solution and believe this partnership will benefit our customers and partners who have voiced a need for us to marry our complimenting capabilities and feature set,” said Tim Welu, CEO of Paisley Consulting. “We consider our integration with Microsoft a great achievement and look forward to the continued evolution of our products, while establishing a longstanding relationship with the Visio community at large.”

“We recognize Paisley Consulting as the leader in compliance-driven software solutions. Paisley’s industry track record and success with Sarbanes-Oxley solutions made them an obvious partner to provide high value to our customers,” said Sanjay Puri, Sr. Product Manager of Microsoft. “Together, we will be able to provide enhanced data entry and visual reporting capabilities to our compliance

and audit customers, bringing them a richer and more visually attractive dashboards to view and manage their business processes as they relate to compliance.”

Microsoft Office Visio is a diagramming program that can help customers create business and technical diagrams that document and organize complex ideas, processes, and systems. Diagrams created in Visio enable customers to visualize and communicate information clearly, concisely, and effectively in ways that text and numbers cannot. Visio also automates data visualization by synchronizing directly with data sources to provide up-to-date diagrams, and it can be customized to meet the needs of any business or organization.

Founded by internal auditors over 10 years ago, Paisley Consulting has helped more than 1200 customers, including 35 percent of Fortune 100 companies across a variety of industries, achieve their compliance and risk management goals.

Founded in 1995, Paisley Consulting is the recognized leader in providing more than 1,200 organizations—including 35 percent of the Fortune 100—with comprehensive and tightly integrated solutions to better identify and reconcile the risks impacting organizations, thereby ensuring that evaluations of operational risk are completed quickly, consistently and accurately.

Leveraging industry best practices, a common technology platform and a unified database to facilitate standardized, automated and collaborative processes across the enterprise, Paisley Consulting customers are empowered to improve the accuracy, consistency and efficiency associated with Sarbanes-Oxley compliance, internal audit, general compliance and operational risk management initiatives. Developed for companies of every size and across multiple industries, Paisley Consulting’s solutions can be implemented as an integrated whole for maximum value or may be deployed as individual point solutions. Either way, our best-of-value solutions can help you reduce costs and target opportunities for continuous improvement.
