Paisley Consulting Selected To Integrate With MS Office Visio 12

By Compliance Pipeline Staff

Paisley Consulting said today that it has been selected as one of the compliance software vendors of choice to participate in the integration of a beta version of Microsoft Office Visio 12, a diagramming tool that assists IT and business professionals in visualizing, analyzing and communicating complex information, systems and processes.

The complete integrated version, which will provide an enterprise the ability to enter business processes and run visual reports on existing processes, risk and control information throughout their company, is expected to be released after the launch of [Microsoft Office Visio 12](#), which is planned for the second half of 2006. A prototype of the integrated Paisley & Visio software will be demonstrated by Paisley Consulting at the upcoming Microsoft Visio Conference in Seattle on January 20th.

"We recognize Paisley Consulting as the leader in compliance-driven software solutions," said Sanjay Puri, a senior product manager with Microsoft. "Paisley's industry track record and success with Sarbanes-Oxley solutions made them an obvious partner to provide high value to our customers. Together, we will be able to provide enhanced data entry and visual reporting capabilities to our compliance and audit customers, bringing them richer and more visually attractive dashboards to view and manage their business processes as they relate to compliance."

Microsoft Office Visio is a diagramming application used to create business and technical diagrams that document and organize complex ideas, processes, and systems. Visio also automates data visualization by synchronizing directly with data sources to provide up-to-date diagrams, and it can be customized to meet particular business needs.

Founded by internal auditors more than 10 years ago, Paisley Consulting has helped more than 1200 customers, including 35 percent of Fortune 100 companies across a variety of industries, achieve their compliance and risk management goals.
